

How to Work a Combination Lock

1. Turn the dial to the RIGHT several times just to warm it up.
2. Slow down and stop at the *first number* of your combination. You cannot “wobble” around the number; you must stop on it directly.
3. Turn the dial to the LEFT all the way around past the first number and stop at the *second number*. Again, you cannot “wobble” around the number.
4. Turn the dial to the RIGHT (the way you went the first time) and go directly and slowly to the *third number*.
5. Pull down on the lock so it will open. Tah-dah! Success. You did it!

If you mess up, wobble around, or do a step wrong, you have to start all over. Take your time and get it right!
